

Adenwalla Orthodontics

Records Consent Form

Instructions: Please sign and bring with you to your Records Visit.

The Records appointment is an important part of the orthodontic treatment program. At this appointment two X-rays are taken called a Cephalogram and a Panorex.

***The Cephalogram is an x-ray of the entire skull and shows the bone structure and profile of the patient.

***The Panorex shows the structure inside the mouth and of the teeth.

***Impressions are also taken of the teeth. These are kept as a permanent record of the teeth.

***Photos are taken of the face, the profile and of the inside of the patient's mouth.

The records are needed to assist the doctor in determining the treatment plan, how and where to move the teeth so as to create optimum facial harmony and ideal occlusion.

We will gladly bill the insurance company if applicable for the records fee. Funds received will be applied directly to the patient's account, either coordinating with your payment or crediting the account.

Regardless of insurance coverage you, as the guarantor, are responsible for the total Records fee of \$250.00
